

EDUCATION

International Institute of Information Technology Executive Post Graduation Program; GPA: 3.74/4 Jawaharlal Nehru National College of Engineering Bachelor of Engineering; GPA: 7.7/10 Morarji Desai Science PU College Science (PCMB); Percentage: 83/100	Bangalore, India November 2023 – December 2024 Shimoga, India August 2017 – August 2021 Shimoga, India June 2015 - March 2017
--	--

SKILLS SUMMARY

- **Languages:** Node.js, Javascript, Typescript, HTML5, CSS3, Python(Basic)
- **Frameworks:** Angular, React, Express, Numpy, Pandas(Basics)
- **Tools:** Visual Studio Code, PostgreSQL, Elastic Search, Postman, JIRA, Excel, PowerPoint, Jupyter Notebook
- **Version Control:** Git Repo
- **Soft Skills:** People Management, Excellent communication

WORK EXPERIENCE

Senior Systems Engineer Infosys Limited	March 2022 - Present
◦ Designed, developed, and maintaining a cohort learning application, implemented AI features to enhance the application. ◦ Integrated CI/CD pipelines into development lifecycle, improving code quality and accelerating deployment cycles. ◦ Created a reusable chat utility library using Angular and Node.js, enabling integration of messaging features across multiple applications. ◦ Designed and developed dashboard in web applications using React.js to get the insights of analytics. ◦ Designed and developed RESTful APIs using Node.js to ensure seamless communication between application components and enhance overall system performance. ◦ Expertise in CSS media queries for responsive design. ◦ Utilized Angular Materials for building responsive, user-friendly interfaces and integrated Chart.js. ◦ Collaborated with cross-functional teams to gather requirements. ◦ Skilled in version control using Git and Agile/Scrum methodologies. ◦ Contributed for code reviews, fixed vulnerabilities, identified areas for improvement, and implemented best practices for code quality and maintainability. ◦ Proficient in prompt engineering to use AI tools to enhance development efficiency.	

PROJECTS

Cohort Learning Application
◦ Designed and developed screens displaying information about course expirations, chapters, and progress leaderboard using Angular. ◦ Developed a screen for displaying learning content for the cohort. ◦ Implemented a chat feature for collaboration between learners and the coordinator of the group. ◦ Wrote APIs to ensure effective communication between learners and coordinators. ◦ Developed and optimized scalable and efficient APIs using Node.js, meeting project requirements and ensuring high performance. ◦ Integrated AI and wrote prompts to summarize the responses given by learners. ◦ Implemented CI/CD pipelines to automate the code deployment, reducing the deployment time by 30%.
Cohort Management Application
◦ Developed a calendar and dashboard view for coordinators to gain insights into the progress and status of learners. ◦ Implemented an announcement feature to broadcast information to all users. ◦ Added a chat feature for communication with learners. ◦ Created an option to add learners to a group using file upload. ◦ Provided easy access to progress reports for tracking the status of learners. ◦ Wrote APIs using Node.js to make effective communication between client side and server side. ◦ Implemented CI/CD pipelines to automate code deployment, reducing deployment time by 30%.
Simulator Using AI(AIMulator)
◦ Developed screens for game simulation using artificial intelligence to evaluate the user's scores of gamers using React. ◦ Communication between players in the game using React.js. ◦ Wrote RESTful APIs using Node.js and queries in PostgreSQL to retrieve data from Database.

RECOGNITION

Insta Award	December 2024
--------------------	----------------------

- For contributions in developing Cohort V2 application using angular, node, express and handling process related work in the team by showing excellent communication and presentation skills.
